

Zardonis Jérémie ZITTI

PRODUCT ENGINEER

jeremie@skill-uv.com · zardonis.skill-uv.com · github.com/jeremie0342 · linkedin.com/in/jérémiezitti · Cotonou, Benin (GMT+1)

Product engineer. I work from framing through to running it, and I carry together the two decisions usually kept apart: what the product has to do, and what will make it hold.

EXPERIENCE

2025 / Present
Remote

Full-stack developer and backend architect

KPS Groupe

Lead architect on UBBFY, a multi-tenant SaaS platform run by about ten companies, the largest managing two hundred employees and contractors. The platform holds thirty-three server-side modules, 338 data models and close to four hundred screens in three languages, built by a team of eight. My part since October 2025: the foundations, meaning per-module permissions configured rather than coded, an event bus on Celery, an audit trail, object storage and a currency service covering 160 currencies; eight business modules delivered end to end, among them documents with electronic signature, the helpdesk and billing through Stripe and FedaPay; the platform administration application; and 1,154 commits across the two repositories. Three further production systems delivered across the same period, among them a civic platform and an ETL pipeline.

2025 / Present
Remote

Chief technical officer

Orisum Groupe

Technical direction of Yara across a team of three, covering frontend, backend and operations: architecture, stack decisions, scope, deadlines and code review. One digital identity replacing the physical ticket for events, restaurants and tourism. Private beta, public launch in Q4 2026.

2024 / 2025
Bénin

Software engineer, internship

BestCash

Internal dashboards and documentation tools for a fintech running virtual and physical prepaid cards, mobile money and payment services. Responsive interfaces, user data management and technical documentation across several internal projects, in Angular and NestJS.

SELECTED WORK

2026

Skilluv

A skill platform built solo as a polyglot architecture, with a public governance layer around it. Open beta January 2027.

Rust / Axum / SvelteKit / Python / gRPC / Redis / PostgreSQL

2025

UBBFY

Lead architect on a multi-tenant ERP, CRM and HR platform in production for many clients.

Django / DRF / Vue 3 / Celery / PostgreSQL / Stripe / FedaPay

2026

Allons Voter

A civic technology platform deployed during the 2026 Benin presidential campaign, designed and shipped end to end.

Next.js 16 / MongoDB / MinIO / JWT

2025	Yara Technical direction of a cultural and tourism platform: one digital identity replacing the physical ticket for events, restaurants and tourism. Private beta, public launch in Q4 2026. Node.js / Express / Vue.js
2026	Chess coach A self-hosted coach that reads your own games rather than a generic curriculum, split across a backend and a game engine client. Python / FastAPI / PostgreSQL / Stockfish / Unity 6 / C#
2026	TrackMyWeight A local-first fitness and nutrition tracker for Android, built on a food database written for the people using it rather than translated for them. Kotlin / Jetpack Compose / Room / Hilt / Health Connect

EDUCATION

2024	Professional bachelor's in computer software engineering Licence professionnelle SIL. UATM GASA Formation, Benin.
